

# What are “Principles of Campus Space Management”

## Definitions

**Space Planning Guidelines** most often refer to the planning and design of space

**Space Planning Standards** refer to the characteristics of specific space types that are assigned to each population or function.

**Space Allocation Process** is the set of steps by which space allocations are derived and decisions are made.

**Space Management Principles** are the principles that guide the definition and application of the **Space Planning Guidelines**, the creation and implementation of **Space Planning Standards** and the steps that are applied to the **Space Allocation Process**.
